

Physical Boundary Analysis: Training Sample $\rightarrow$ ($q=1, \delta\lambda=0$)

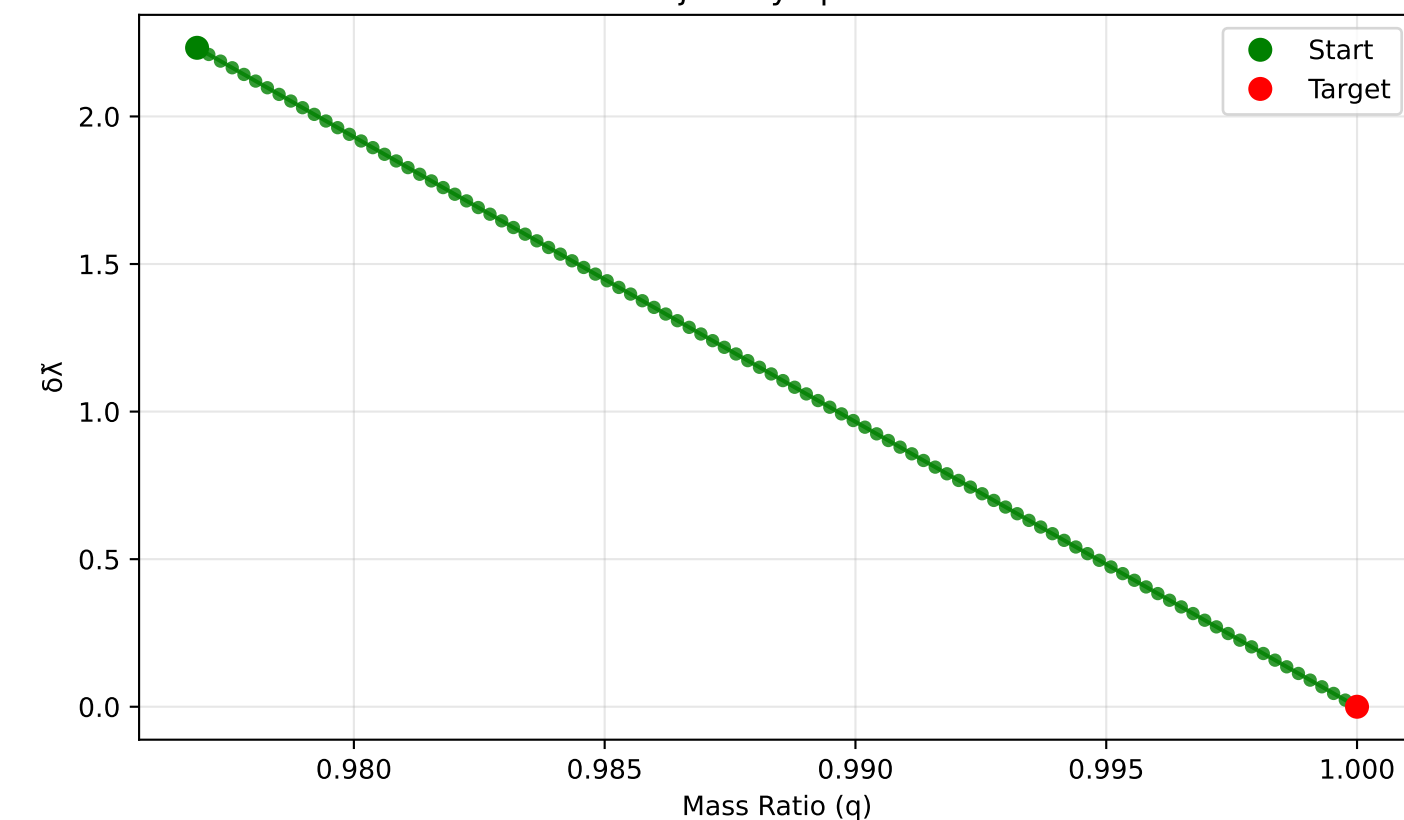

NF Prior: $\ln(\text{prob})$ vs Mass Ratio

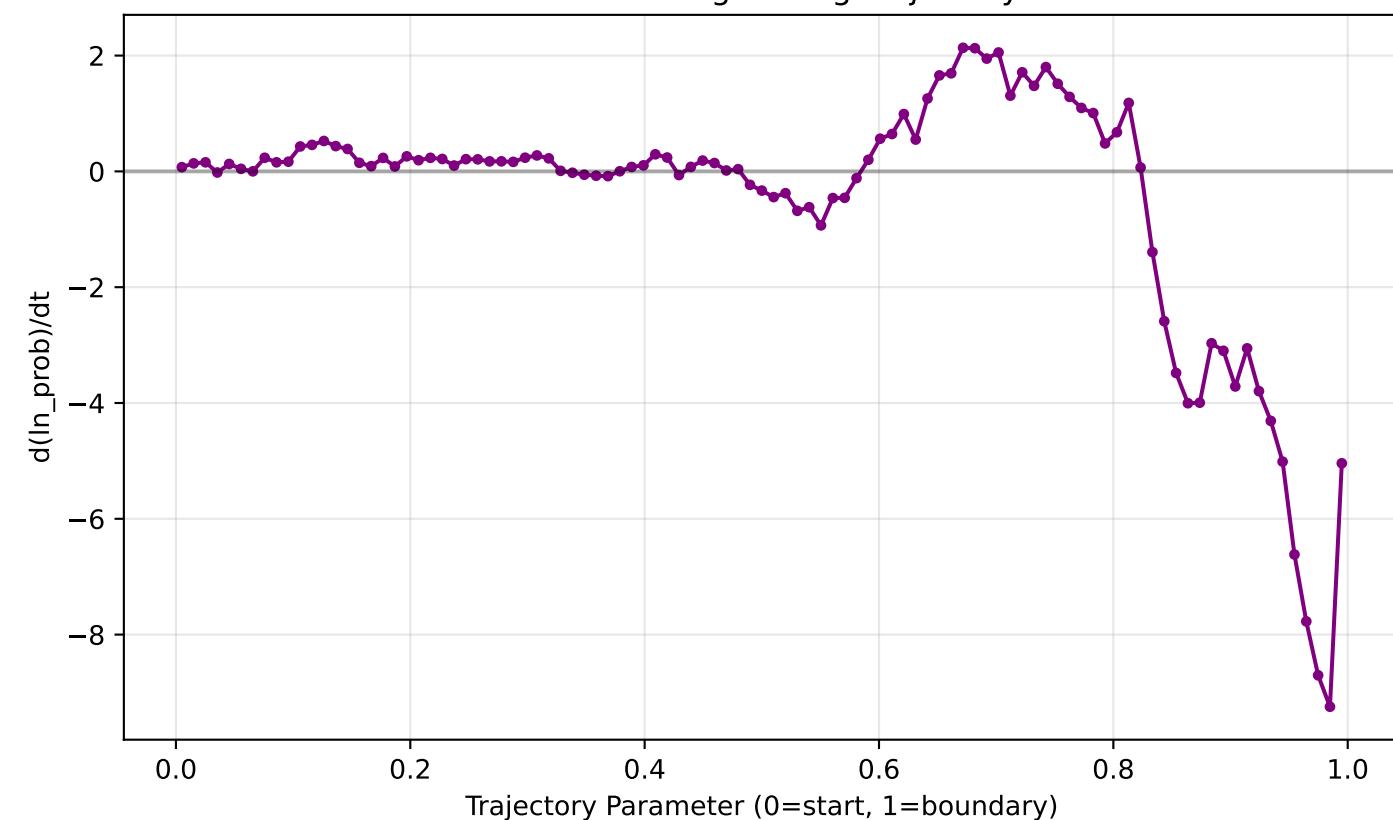

NF Prior: $\ln(\text{prob})$ vs $\delta\lambda$

Trajectory: q vs $\delta\lambda$

Rate of Change Along Trajectory

Starting Point:
 $q = 0.977$
 $M_c = 1.630 M_\odot$
 $\lambda_1 = 124.1$
 $\lambda_2 = 142.9$
 $\delta\lambda = 2.2$

Target:
 $q = 1.0$
 $\delta\lambda = 0.0$
 $(\lambda_1 = \lambda_2)$
